2. Copy the «pm_crosssellingoncart» folder on your website, into the «modules» folder
3. Login to Prestashop back-office
4. In «Modules» tab, click on «Install» button of «Cross Selling on Cart»
5. Click on «Configure» for settings

Configuration

Settings

- Display products already in cart : This option prevents than the products who are already in the cart of your customers are shown.
- Products quantity display : Set the number of products to display simultaneously. If the products quantity is bigger than this value, a vertical scroll will be proposed.
- Bloc title: Give a name to your cross-sell block to encourage the purchase.

Products

- You can add as many products as necessary in the cross-selling block displayed on the cart summary.

To do this, choose a product to add to the list, then click the + button

If your catalog contains many products, you can use the field «Filter» to restrict results to your search criteria.

- Once your products added, you can arrange them with your mouse (drag&drop).
- To delete, click the red cross in front of each product.
